- 9614/G Ground plate to punch on
- 9614/I Central bolt
- 9614/K Knife holder
- 9614/L Long bar
- 9614/SK Special cutting knife for gaskets made of Statotherm graphite without carrier and with stainless steel smooth metal carrier (not suitable for graphite with punched metal carrier).

Features

The gasket cutter consists of a base plate to cut on, a short and a long bar with a sliding cutting tool. The sealing material is fixed by the central bolt. The tools to punch the central hole are easy to handle. After fixing the sealing material on the base plate and adjusting the cutting diameter on the bar, the gasket is cut by rotating the cutting tool.

Forms of supply

Set / spare parts

Advantages

Especially suitable to produce small quantities of gaskets from sheet materials. An easy-to-handle special tool. Also suitable for rubber, plastics and other materials; from inner diameter 30 mm up to outer diameter 1,000 mm.
