

Packing extractor 9611

Forms of supply

Available in 4 sizes:

Diameter 3.5 mm: length 120 mm

Diameter 6 mm: length 160 mm

Diameter 8 mm: length 210 mm

Diameter 10 mm: length 260 mm

Features

A robust, handy, special tool for packing removal from pumps, agitators, valves, etc. Proven by thousands of tools in use, it reduces the time to replace packings drastically. Prevents damage to shaft when used correctly while replacing the packing.

Advantages

The flexible, torque-resistant, shaft enables secure and complete removal of the old packing rings even in difficult-to-reach installations.
