

Pump packing cutter 9612

Forms of supply

Set / spare parts

Features

Easy to handle special tool for exact cutting of packing material. Makes cutting of exact length of packing rings with straight cut easy for pumps up to a shaft diameter of 110 mm.

Guarantees the correct length of packing to suit the shaft diameter. (special extension scale up to 250mm shaft diameter available).

No waste due to badly cut packings (too long or too short); quick and easy handling; ensures clean ends cut to the precise angle required.

Advantages

With the help of an adjustable stop and a scale, the exact cutting length can be set. The packing is held with a clamp and then cut with a knife.
